

# EVERY BREATH MATTERS.

Don't let RSV take your breath away.

60+

CDC recommends  
ABRYSVO for adults  
60 years and older  
to help protect  
against RSV.

## ABRYSVO™

Respiratory Syncytial Virus Vaccine

from

Actor portrayal

### INDICATION

ABRYSVO™ is a vaccine indicated for the prevention of lower respiratory tract disease caused by respiratory syncytial virus (RSV) in adults 60 years of age and older.

### IMPORTANT SAFETY INFORMATION

- ABRYSVO should not be given to anyone with a history of severe allergic reaction (eg, anaphylaxis) to any of its components

Please see Important Safety Information continued on pages 2-6. Please click for full [Prescribing Information](#) for ABRYSVO.

# RSV is a highly contagious virus that can have severe symptoms.

Respiratory syncytial virus (RSV), is a virus that affects the lungs and airways, and spreads easily. With symptoms similar to the flu, it can range from mild to severe, potentially leading to difficulties in breathing.

Actor portrayal

RSV can start mild, like a cold, with symptoms like congestion, runny nose, sore throat, fever and cough. But it can quickly become serious, with symptoms like:

- **difficulty breathing**
- **wheezing**
- **wet cough**
- **pneumonia**

## **IMPORTANT SAFETY INFORMATION (continued)**

- Vaccination with ABRYSVO may not protect all people

Please see Important Safety Information continued on pages 1-6. Please click for full [Prescribing Information](#) for ABRYSVO.

# Even healthy people aged 60 or older can become sick with RSV.

As you age, your immune system weakens, potentially leaving you vulnerable to serious infections, like RSV.

RSV can be serious for adults over the age of 60 and can worsen conditions such as:

- Asthma
- Chronic obstructive pulmonary disease (COPD)
- Congestive heart failure

In very serious cases, RSV can lead to hospitalization and death.

## IMPORTANT SAFETY INFORMATION (continued)

- In adults 60 years of age and older, the most common side effects ( $\geq 10\%$ ) were fatigue, headache, pain at the injection site, and muscle pain

Ask your healthcare provider about the risks and benefits of ABRYSVO. Only a healthcare provider can decide if ABRYSVO is right for you. Always talk to your healthcare provider about any side effects you may experience.

Please see Important Safety Information continued on pages 1-6. Please click for full [Prescribing Information](#) for ABRYSVO.

BREATHS TO SHOW 'EM  
YOUR STUFF.

Actor portrayal

## ABRYSVO is proven to help protect against RSV.

The CDC recommends adults 60 and older talk with their doctor about getting vaccinated with ABRYSVO.

ABRYSVO (Respiratory Syncytial Virus Vaccine) helps your immune system make antibodies against RSV, so your body is better prepared to help protect you from the virus.

ABRYSVO was studied in a large clinical trial of 34,000 adults 60 and older, where half received ABRYSVO and half received placebo. Pfizer's RSV vaccine ABRYSVO was proven effective against RSV.

The most common side effects of participants who received ABRYSVO were fatigue, headache, pain at the injection site, and muscle pain. 9 out of 10 adults who received ABRYSVO in the clinical trial reported no injection-site side effects.
